Theme: Sustainable living for "Lake Van"

CONFERENCE PROGRAM

Information for the Participants

Welcome to Van City

Van is a city in Eastern Turkey, with unique quirks, one of which is the rare breed of cats that, interestingly, inhabit around Lake Van. Van cats have curious different-colored eyes – one, amber and one, blue – and more curiously, a fondness for swimming in the vast Lake Van. Apart from exotic cats, Van prides in its deep-rooted history that goes as far back as 5,000 BC. Different civilizations and kingdoms shaped Van's history – Urartian, Armenian, Byzantine, Seljuk and Ottoman. Each of these eras left remarkable structures such as the Van Fortress (Urartian) and the Holy Cross Church (Armenian). Nature has also blessed the town of Van, with a lake that is the largest body of water in Turkey.

Conference Venue

The Conference will be held at the Van Yuzuncu Yil University Campus. Van Yuzuncu Yil University was founded on July 20, 1982. However, the attempts to create a university in the east region of Turkey had started much earlier. Atatürk, the president of republic of that period, sent Mustafa Necati, of The Ministry of Education, to examine on-site the situation in Van in 1927. Mustafa Necati found in favour of the foundation of a university in Van. Ferit Nur, the teacher, was sent to Van and was asked to transform the present middle school into a high school and to form the kernel of the planned university. Atatürk said, "We must go into action to constitute a modern city of culture with a primary school and finally a university in the most beautiful places on the coasts of The Lake Van for the east region" and with this aim, he sent Saffet Arkan, The Ministry of Education of that period, to Van for land determination. Van Yüzüncü Yil University, with its 17 faculties, 5 institutes, 4 vocational schools, 9 vocational schools, 1 conservatory, 43 practice and research centers, is located 15 km from the city center and around Lake Van.

Conference Sessions

The conference Welcome Reception will be held at the Engineering Faculty on Monday morning (Oct. 3h, 2022), and all technical sessions and networking events will follow on Monday through Tuesday. In addition, zoom links will be provided for the remote presenters and participants who have decided to telecommute.
